Notes: If this is helpful for you and you choose to use it as a guide, consider the following:

- You can switch any food or meal for another with the same calorie count.
- You can adjust serving sizes as required to hit specific calorie goals or skip meals to free up calories for other times.
- Make sure you are aware of sauces or oils other than those mentioned used for cooking or added at any stage as they add calories and impact progress
- Similarly any drinks containing calories would need to be accounted for in addition to the food choices
